

We are currently seeking a Commissioning Engineer (m/f/d) in the Farmington Hills.

MAJOR AREAS OF RESPONSIBILITY

- Continuous development and optimization of honing process
- Perform acceptance runs for Gehring honing machines at Gehring facilities and at customer's site
- Provide support for Gehring honing machines and process related tasks in-house and at customer's site

PRIMARY OBJECTIVES

- Commissioning and qualification of new machines
- Respond effectively to service calls
- Develop and refine workpiece-specific honing processes

SPECIFIC RESPONSIBILITIES OF THE POSITION

- Commissioning and process installation of Honing machines and equipment: Achieve and maintain required quality and capability
- Execute machine build, alignment, and service tasks when needed
- Support Gehring internally as well as with customers in process related tasks to achieve mutual goals

REQUIRED SKILLS AND ABILITIES

- Mechanical background. Machining or Machine set-up experience preferred. Setting up bore gauges, indicators etc. Other mechanical disciplines also beneficial.
- Effective communicator- Can effectively communicate, in a professional manner, internally as well as to customers through email, phone conference, and face-to-face interactions.
- Ability to learn and persevere through a training itinerary that will include machine building, machine alignment, tooling assembly/repair, abrasive mounting, abrasive selection, honing process development, mechanical and process troubleshooting, among others.
- Willingness to travel to domestic and international assignments. Must have a current passport. No travel restrictions.
